

Adding important information to your NHS Summary Care Record

You already have a Summary Care Record (SCR)

Your SCR has important information about your health in it:

- Medicines you take
- Allergies you have
- Any medicines that make you ill

You might need to see a doctor or nurse who does not know you

If they do not know about your care, your SCR could:

- Stop them making a mistake, because they can see your medicines, allergies or what medicines make you ill
- Help them see your information straight away on a computer

Doctors and nurses treating you will ask if they can look at your SCR to help them treat you quickly and safely

You can choose to have other useful information added to your SCR, including:

- Your illnesses and any health problems
- Operations and vaccinations you have had in the past
- How you would like to be treated such as where you would prefer to receive care
- What support you might need
- Who should be contacted for more information about you

What to do next

If there is information you don't want adding, let your GP practice know

For more information

- Talk to staff at your GP practice
- Call 0300 303 5678
- Visit <u>hscic.gov.uk/scr</u>
